

Think SMART Overview

Get hands-on with IT

Red River is a technology transformation company headquartered in Claremont, NH. We are also a community of people who strive to make a difference in the communities where we live and work.

Are you a high school student that's interested in IT and enjoys hands-on learning? Red River's Think SMART program incorporates real-world learning in a professional work environment. Students will gain Skills, Mentorship, Access, Readiness and Technology through hands-on IT troubleshooting, interviewing and business skills with the support of the Red River IT team and by learning from one another.

This collaborative program focuses on more than just break/fix IT skills and lays the foundation for students to be successful in a professional work environment.

What Students will Gain:

Skills	Resume building and presentation General business skills including interview prep And Technical skills using laptops, PC's, servers and more.
Mentor	Collaboration with Red River employees Leadership skill development to mentor each other Connections to other industry leaders in the area
Access	Red River's facility and equipment IT systems including laptops, PC's, hardware and software Various operating systems Ethernet and LAN IT monitoring tools
Readiness	For college prep and career path options Diverse workplace readiness Interview and presentation skills Financial planning and advice
Technology	Break/fix PC and laptop Various operating systems IT monitoring tools Cabling builds Virtualization and Cloud overview and much more

You will earn high school credits for participating in this program.

Back In 2019!

The program will expand to include an interactive tour of the Claremont MakerSpace, and a session presented by Claremont Savings Bank on credit, general banking, fraud and financial life skills.
